Just a quick follow up, the PM's are still looking. They don't remember seeing anything as far as amendments that have come in to correct labeling and remove Prop 65 language, so they are having to check through the amendments that have come in since we sent the letter, which (as you are aware), we are pretty backed up on. A big part of the problem is that we don't have a list of which products were changed, so there's no way to cut to the chase. Can you tell me if this is a time sensitive question? I'm trying to figure out if I need to put more people on this, but don't want to let other things fall through the cracks.

Thanks,
Dan

Hi Mike. Just FYI, I'm checking on this. I don't know if we have the information on which products exactly have this, but we're checking for any that have come in that deal with this and which involve a label amendment. I'll let you know as soon as I can.

Thanks,
Dan

Dan

What is the status of the labels that were to be revised within the 90-day window?

There were only two that had this warning for glyphosate?

Per the discussion at today's OGC General. We are working to develop roll-out materials, as well. Let

us know if the OCSPP-IO has any comments. We will hold on sending the letters until the comms/roll-out materials have been approved.
